## SABESP CORPORATE GIS PROJECT

*Client: Basic Sanitation Agency of the State of Sao Paulo, Brazil (SABESP)*

**Malone Given Parsons Ltd.** worked with Brazilian engineering firms to design a geographic information system for the one of the world's largest water and sewer utilities in Sao Paulo State, Brazil. SABESP has over 20 million customers for sewer and water facilities and 10,000 employees. The project has five major components:

1. Design of digital base maps that was used to support the planning and operational activities of 4 major departments.
2. Integration of the existing parcel information with the new GIS
3. Integration of GIS with existing business Systems.
4. Development of a GIS Implementation Strategy for all departments of SABESP.
5. Development and testing of six Prototypes to demonstrate various aspects of the final system
